

Product Acceptance Decision Chart - Draft

- * Wholesome: Does the Product in question meet your organizations dietary / nutritional standards?
- * Shippable: Is the Product in question in a suitable format for further distribution (if not used at your location)?
- * Capacity is a function of Product velocity and shelf-life. To be determined by your organization.
- * Refer the donator to another charitable organization with different Product needs and acceptance criteria.
- * Gleaning: The harvesting of farm crops that are not economically profitable to commercially harvest or harvesting of leftover farm crops after commercial harvesting.
